SUBJECT INDEX

Angular scattering
Angular scattering and internal energy deposition in kiloelectronvolt collision activated decomposition reactions of some low mass cations 191

Binary salt systems
Separation of mass spectra of binary salt systems: calculations of mass spectra of pure system components from binary data 31

C^+ ions
Spin conservation in collision of C^+ ions with atomic and molecular targets 63
Cesium salts
Secondary ion emission from cesium salts under megaelectronvolt ion bombardment: comparative study and beam secondary effects 119
CH_4^+ ions
Energy transfer in kiloelectronvolt collisional activation determined from relative yields and translational energies of fragment ions formed in collision activated decomposition of CH_4^+ ions 161
Charge transfer rate
Simple theory of the charge transfer rate in ion/molecule reactions. Part 4. Structure of the activated complex 89

Diacetylene
The proton affinity and selected ion/molecule reactions of diacetylene 43
Dicarbonyl compounds
Dissociation of ionized keto–enol tautomers of some 1,3-dicarbonyl compounds 101

Electrostatic analyzer
Peak broadening caused by a fifth-order aberration in the fringing field of an electrostatic analyzer 1
Energy transfer
Energy transfer in kiloelectronvolt collisional activation determined from relative yields and translational energies of fragment ions formed in collision activated decomposition of CH_4^+ ions 161

Helium atoms
The formation and destruction of highly excited helium atoms in 4–25 keV collisions with the rare gases and simple molecules 75

Kinetic energy distributions
The use of kinetic energy distributions to determine the relative contributions of gas-phase and surface fragmentation in kiloelectronvolt ion sputtering of a quaternary ammonium salt 215

Molecular beam intensity distribution
Modelling of the molecular beam intensity distribution by means of an infrared beam 55
Multiple-sector isotope ratio
Multiple-sector isotope-ratio mass spectrometer design for high transmission efficiency 225

$NCCCCN^{+\bullet}$
Unimolecular loss of molecular nitrogen from metastable dicyano-acetylene radical cation ($NCCCCN^{+\bullet}$)

Osmium isotopes
Osmium isotope ratio determination by negative thermal ionization mass spectrometry 147

Peptides
A pulsed ion bombardment time-of-flight mass spectrometer with high sensitivity for the analysis of peptides 129

Quaternary ammonium salt
The use of kinetic energy distributions to determine the relative contributions of gas-phase and surface fragmentation in kiloelectronvolt ion sputtering of a quaternary ammonium salt 215

Tandem quadrupole–ion trap mass spectrometer
A tandem quadrupole–ion trap mass spectrometer 13
